CALL (843) 572-5714

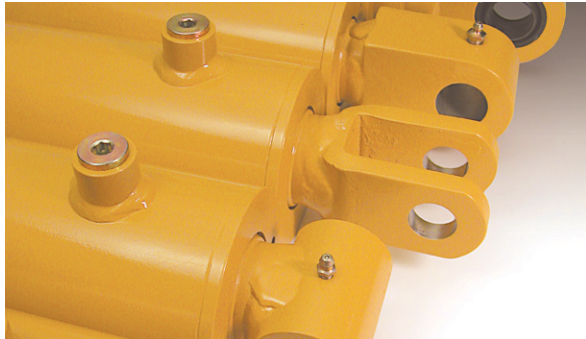

At Aggressive Hydraulics we have a passion for creating precision hydraulic cylinders, the kind that build better OEM products – and better business for distributors and repair facilities. Our staff at Aggressive Hydraulics' have 100's of years of combined experience within the mobile hydraulic cylinder industry on a global basis. We have been directly involved in designing and manufacturing hundreds of thousands of hydraulic cylinders in virtually all industries since 1980.

Engineered to Move Your Business™

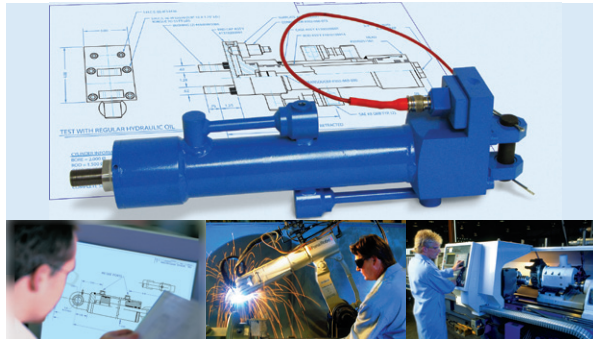

Call (843) 572-5714

Standard Cylinders

Setting the industry standard for cylinders. These cylinders are pre-engineered using the most common mounting configurations as well as bore to rod combinations.

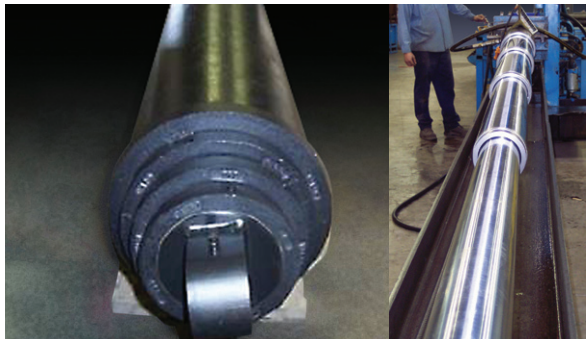

Custom Built Cylinders

Custom built cylinders designed and manufactured for your specific application. Whether its single or multiple staged, or if you have special requirements like electronic- position sensing, we're your source.

Cylinder Components

Aggressive Hydraulics custom parts program can make ordinary hard-to-find, tough-to-get parts more readily available. Our component parts are designed and produced to fit your exact standards, and to provide you with meticulously manufactured parts.

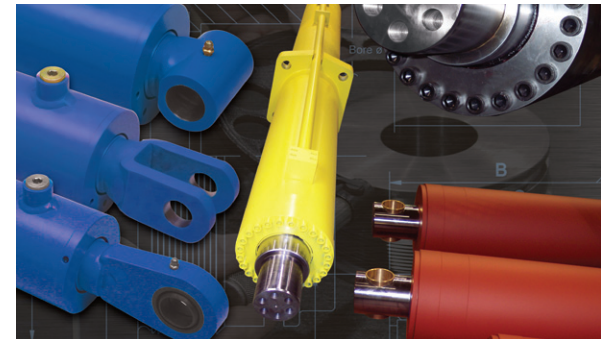

Telescopic Replacement Cylinders

Precision Single and Double-Acting Telescopic Cylinders. In stock and ready to ship from 6 convenient warehouse locations.

Benton Harbor Engineering Cylinders and Parts

Over the years, Benton Harbor Engineering has manufactured thousands of hydraulic cylinders for equipment Mfrs such as Koehring, Terex, Altec, Batam, and PPM, to name a few. If the cylinder you are looking for was manufactured by BHE, Aggressive Hydraulics has the prints on file to build you a new cylinder replacement.

Replace vs Rebuild

Some repair facilities will be happy to take your money and perform a temporary patch job on your cylinder. We hold our work to a higher standard. We just don't repair; we rebuild, digging deeper to get to the heart of the problem and to re-engineer the part to better-than-new condition. Typically, cylinders leave our shop offering a performance that goes beyond the original equipment manufacturers' specifications.
